Course Overview

The **MEAN Stack Development Course** is designed for students, freshers, career switchers, and working professionals who want to build modern, scalable web applications. You will learn frontend, backend, database management, REST API development, and real-time project execution — all in one comprehensive 3-month program.

- Complete Full Stack Web Development using **MongoDB · Express.js · Angular · Node.js**

By the end of the course, you will have a GitHub portfolio, interview-ready skills, and hands-on experience with production-style projects.

Who Can Join?

- 🎓 **Students**
- 💼 **Freshers**
- 🔄 **Career Switchers**
- 👔 **Working Professionals**
- 📘 **BCA / B.Sc / B.Tech / MCA**
- 🌐 **Web Dev Enthusiasts**

Technologies You Will Learn

Frontend

- HTML5 & CSS3
- Bootstrap
- JavaScript & TypeScript
- Angular Framework

Backend

- Node.js
- Express.js
- REST APIs
- Middleware & Auth

Database

- MongoDB & Atlas
- Mongoose ORM
- CRUD Operations
- Schema & Validation

Dev Tools

- VS Code
- Postman
- Git & GitHub
- Chrome DevTools

Course Modules

Six structured modules take you from zero to full-stack — each building on the last for a seamless, progressive learning journey.

1	**Web Dev Basics** HTML, CSS, Bootstrap, responsive layouts, forms, navbars, and cards.
2	**JavaScript & TypeScript** Variables, arrays, DOM, events, ES6 features, and TypeScript fundamentals.
3	**Angular Development** Components, data binding, directives, routing, services, and form validation.
4	**Node.js & Express.js** Server setup, routing, controllers, middleware, and REST API architecture.
5	**MongoDB & Mongoose** Collections, CRUD, schemas, models, database connections, and data validation.
6	**Full Stack Integration** Angular + Express integration, auth flow, Postman testing, GitHub, and deployment.

Your 3-Month MEAN Stack Success Roadmap

From Beginner to Job-Ready MEAN Stack Developer

1

Month 1 — Foundation

- HTML, CSS & Bootstrap
- JavaScript Fundamentals
- DOM & Events
- TypeScript Introduction

Build responsive webpages and grasp programming fundamentals.

2

Month 2 — Development

- Angular Components & Routing
- Node.js + Express APIs
- MongoDB CRUD
- Frontend & Backend Forms

Build frontend screens, backend APIs, and database operations.

3

Month 3 — Project + Career

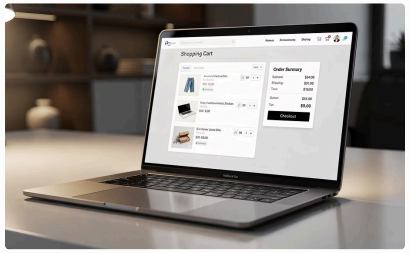

- Full Stack Integration
- JWT Auth Basics
- Real-Time Projects
- Resume & Mock Interviews

Complete real-time projects and prepare confidently for developer interviews.

🏆 **Final Outcome:** Beginner → Job-Ready MEAN Stack Developer with GitHub Portfolio

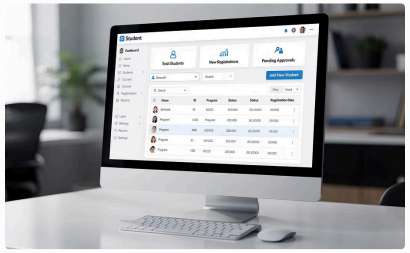

Real-Time Projects

Apply everything you've learned by building three production-style full-stack applications — each showcasing a different domain and skill set.

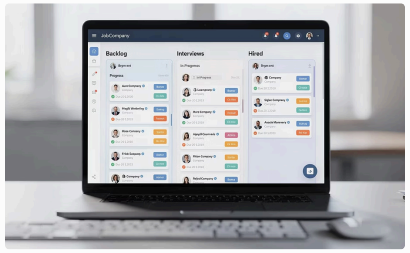

E-Commerce Web App

- Product listing & cart flow
- Login & order management
- Admin panel + backend API

Student Management System

- Student registration & CRUD
- Attendance & course tracking
- Admin dashboard + MongoDB

Task / Job Portal App

- User roles & dashboard
- Search, filters & auth flow
- REST API + database handling

Training Benefits & Career Opportunities

What You Get

Live Practical Classes

Hands-on coding every session — no theory overload.

Daily Assignments & Projects

Reinforce learning with structured daily practice tasks.

Doubt-Clearing Support

One-on-one support to resolve blockers quickly.

Resume & Mock Interviews

Resume reviews, GitHub polish, and mock interview prep.

GitHub Portfolio Guidance

Publish real projects and build a recruiter-ready profile.

Career Roles You Can Target

- MEAN Stack Developer
- Angular Developer
- Node.js Developer
- Backend Developer
- Full Stack Developer
- Junior Software Developer

Start Your Developer Career with XpertsEdgeTechnologies

Join our **3-month MEAN Stack Development Course** and learn to build complete, real-time web applications using MongoDB, Express.js, Angular, and Node.js. Get job-ready with a strong portfolio, mock interviews, and hands-on project experience.
