MERN Stack Development Course

Become a Job-Ready MERN Stack Developer in 3 Months

Master **MongoDB · Express.js · React.js · Node.js** through real-time project training, interview preparation, and a GitHub-ready portfolio.

Real-Time Projects	**Interview Prep**
GitHub Portfolio	**3 Months**

Enroll Now | **Contact: 8870783300**

COURSE OVERVIEW

What You Will Learn & Who It's For

This course is built for **students, freshers, career switchers, and working professionals** who want to confidently build and deploy modern full-stack web applications from scratch.

What You'll Master

- Frontend development with React.js
- Backend APIs with Node.js & Express.js
- MongoDB database design & operations
- REST API integration end-to-end
- Real-time project development
- GitHub portfolio preparation
- Interview readiness & mock sessions

Complete Full Stack Web Development

A structured, project-driven curriculum covering every layer of the MERN stack — from responsive UI to database architecture.

Using **MongoDB · Express.js · React.js · Node.js** — the industry's most in-demand full-stack combination.

WHY XPERTSEDGE

Why Choose This Course & Who Can Join

Why Choose This Course

Beginner-Friendly

No prior coding experience required — we start from the ground up.

Project-Based Learning

Hands-on coding with real-time projects that mirror industry scenarios.

Career Preparation

Resume support, mock interviews, and GitHub portfolio guidance included.

Full Stack Integration

Learn frontend and backend together for complete developer confidence.

Who Can Join

- Students
- Freshers
- Career Switchers
- Working Professionals
- BCA / B.Sc / B.Tech / MCA
- Web Dev Enthusiasts

TECH STACK

Technologies Covered

A comprehensive toolkit spanning the entire MERN stack — from UI design to server logic, database management, and professional developer tools.

Frontend

- HTML5 & CSS3
- Bootstrap / Tailwind CSS
- JavaScript Fundamentals
- React.js & React Router
- Forms & API Integration

Database

- MongoDB & Atlas
- Mongoose ODM
- CRUD Operations
- Schema & Models
- Data Validation

Backend

- Node.js & Express.js
- REST APIs & Middleware
- Controllers & Routing
- JWT Authentication Basics
- Input Validation

Tools

- VS Code & Postman
- Git & GitHub
- npm & MongoDB Compass
- Chrome DevTools
- Deployment Basics

CURRICULUM

Course Modules

Six progressive modules designed to build your skills systematically — from web fundamentals to full-stack project delivery.

1	**Web Development Basics** HTML, CSS, responsive layouts, forms, tables, navbar, cards, and landing page design.
2	**JavaScript Fundamentals** Variables, functions, arrays, objects, DOM, events, ES6 basics, and async JavaScript.
3	**React.js Frontend** Components, props, state, hooks, React Router, forms, validation, and reusable UI components.
4	**Node.js & Express.js Backend** Server setup, routing, controllers, middleware, request/response handling, and REST APIs.
5	**MongoDB & Mongoose** Collections, documents, CRUD operations, schemas, models, database connection, and validation.
6	**Full Stack Integration** React + Express API integration, authentication flow, Postman testing, GitHub, and deployment basics.

SUCCESS ROADMAP

Your 3-Month MERN Stack Success Roadmap

A clear, milestone-driven journey — from absolute beginner to a confident, job-ready MERN Stack Developer.

Month 1 — Foundation

Build strong web development and JavaScript programming basics. Create responsive webpages with HTML, CSS, and Bootstrap.

Month 2 — Development

Build dynamic React frontends, Node.js & Express backends, and perform MongoDB database operations.

Month 3 — Project & Career

Build real-time full stack projects, prepare your GitHub portfolio, and gain interview confidence.

Job-Ready Developer 🏆

Graduate with real projects, a polished portfolio, and the skills employers are hiring for today.

MONTH 1

Foundation Month — Build Strong Basics

Focus: Web development fundamentals and JavaScript programming — your launchpad into the MERN stack.

Topics Covered

- Full Stack & MERN Stack overview
- HTML5, CSS3, Bootstrap / Tailwind CSS
- Responsive layouts, forms, tables, navbar
- JavaScript: variables, data types, operators
- Conditionals, loops, functions, arrays
- Objects, DOM manipulation, events, ES6 basics

Month 1 Outcome

By the end of Month 1, students will confidently build **responsive webpages**, understand JavaScript programming fundamentals, and be fully prepared to dive into React.js and backend development.

Strong foundations make great developers. Month 1 ensures no one is left behind.

MONTH 2

Development Month — Build the Full Stack

Focus: Build dynamic, data-driven applications — React.js on the frontend, Node.js & Express.js on the backend, and MongoDB for data.

React.js Frontend

- Components, props & state
- Hooks & React Router
- Forms, validation & API integration

Node.js & Express.js

- Server setup & REST API development
- Middleware & controllers
- Request / response handling

MongoDB & Mongoose

- CRUD operations & schemas
- Models & database connection
- Data validation fundamentals

Month 2 Outcome: Students build React screens, create backend APIs with Node.js and Express.js, perform MongoDB database operations, and understand the complete full stack application flow.

MONTH 3

Project & Career Month — Become Job-Ready

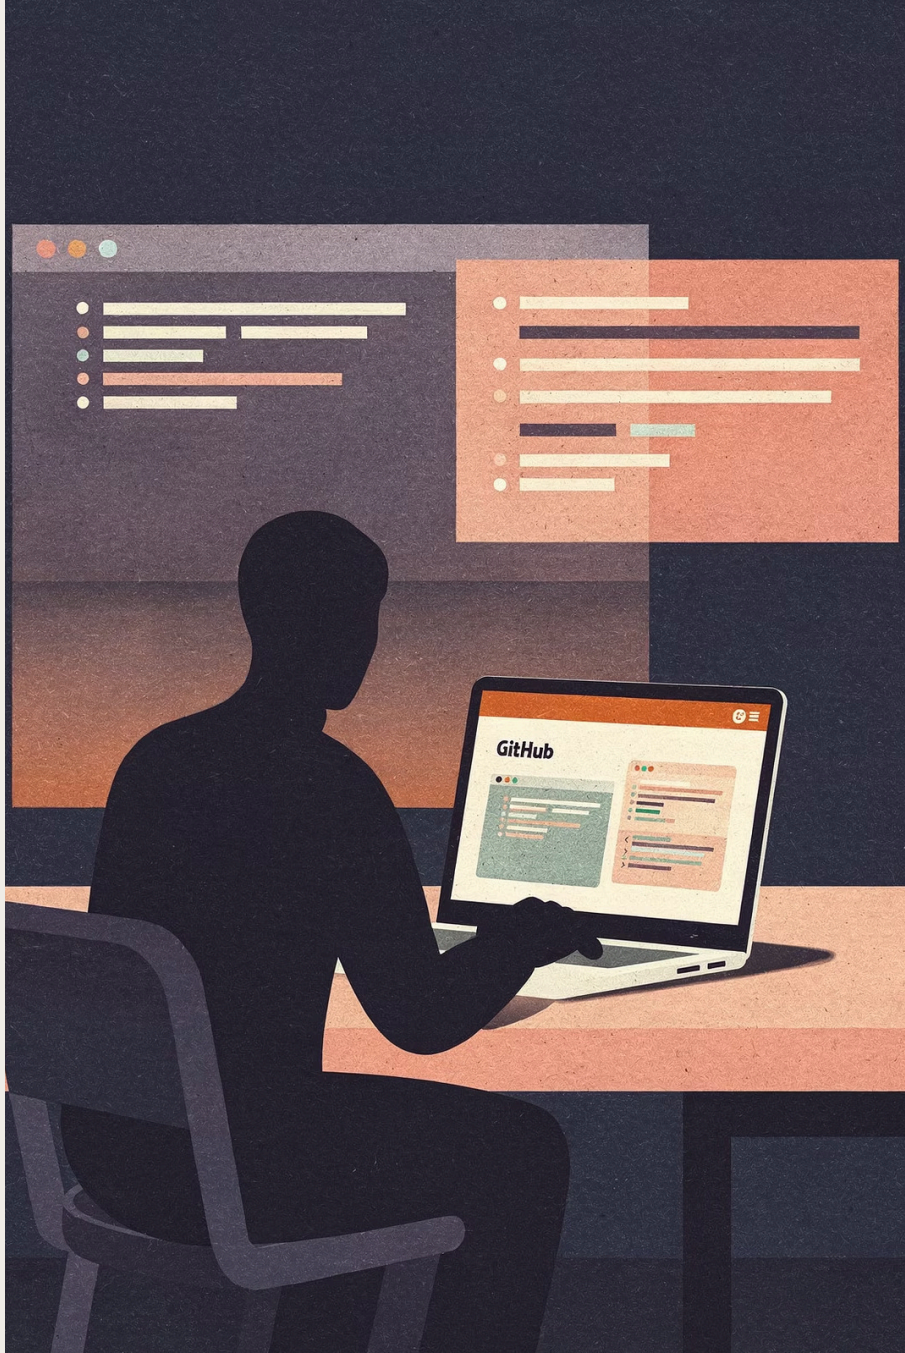

Focus: Integrate all skills into real-time projects and prepare thoroughly for developer interviews and career opportunities.

Topics & Skills

- React + Express full stack API integration
- JWT authentication, login & registration flow
- Error handling & input validation
- Postman API testing & Git/GitHub workflow
- Deployment basics
- Resume preparation & mock interviews
- Project explanation & portfolio guidance

Month 3 Outcome

Students complete **real-time full stack projects**, master frontend-backend-database integration, publish a polished **GitHub portfolio**, and walk into interviews with technical confidence and industry-ready skills.

PROJECTS & ENROLL

Real-Time Projects + Start Your Journey

E-Commerce Web Application

Product listing, cart, login, order flow, admin product management, API integration, and MongoDB database.

Student Management System

Student registration, course management, attendance tracking, admin dashboard, CRUD operations, and MongoDB integration.

Task Management / Job Portal

User roles, dashboard, forms, search, filters, authentication flow, REST API communication, and database handling.
